SKILLS

Backend

- Java, Python, C, C++,
- Spring Boot, Flask, FastAPI,
- REST, OpenAPI

Frontend

- JavaScript, HTML, CSS
- Vue.js, AngularJS

Testing

- JUnit, Mockito, Postman

DevOps & Tools

- GitHub Actions, Jenkins, ArgoCD
- Docker, Kubernetes
- Terraform (IaaS)
- Prometheus & Grafana
- Apache Kafka
- IntelliJ IDEA, Eclipse
- AWS (EC2, Lambda, EKS, S3, RDS)

Architecture & Principles

- Hexagonal
- Layered Architecture,
- Domain-Driven Design (DDD),
- Event-Driven Architecture,
- Solid Principle

Language

- English C1
- German B1
- Hindi C1
- Nepali Native

EDUCATION

Universität Wien – Austria

Master's in Computer Science
2020 - present

Bangalore University – India

Bachelor's in Computer Application
2013 - 2016

Bangalore University

EXPERIENCE

Allianz Technology (10/2021 – Present)

- Maintained and enhanced customer management system with REST API, wrote quality and reusable code, and resolved about 150+ bug reports, resulting in a more stable product version.
- Built a PoC for a modernized backend customer management system using Spring Boot and MongoDB, where data was synced with new system in real time by using Kafka Connect and presented to 10k viewers during Allianz Global Forum.
- As a lead developer, I interviewed and gathered a team of 7 and led to delivery of Allianz Italy's Intercompany Agreement greenfield project in 9 months, leveraging Spring Boot, Kafka, MongoDB, and AWS (ECR, EKS).
- Designed and implemented a middleware platform called Enterprise Process Component (EPC) using Apache camel and Kafka to synchronize multiple systems used by over 5K agents in Allianz France.
- Provided Innovative solution by working closely with PO, customers, developers and business designers.
