Senior backend engineer with 5 years modernizing legacy systems in the insurance domain. Led a greenfield project end-to-end (team of 7, delivered in 9 months) and designed an event-driven integration platform serving 5,000+ agents. Java, Spring Boot, Kafka, Kubernetes, AWS. EU work authorization (Red-White-Red Card plus, Austria).

SKILLS

Backend

- Java, Python, C, C++,
- Spring Boot, Flask, FastAPI,
- REST, OpenAPI

Frontend

- JavaScript, HTML, CSS
- Vue.js, AngularJS

Data

- PostgreSQL, DB2, MongoDB, Redis
- Apache Kafka (Connect, Streams)
- JPA/Hibernate, Flyway

Testing

- JUnit, Mockito, Postman

DevOps & Tools

- GitHub Actions, Jenkins, ArgoCD
- Docker, Kubernetes
- Terraform (IaC)
- Prometheus & Grafana
- IntelliJ IDEA, Eclipse
- AWS (EC2, Lambda, EKS, S3, RDS)

Architecture & Principles

- Hexagonal
- Layered Architecture
- Domain-Driven Design (DDD)
- Event-Driven Architecture
- SOLID

Language

- English C1
- German B1
- Hindi C1
- Nepali Native

EDUCATION

Universität Wien – Austria

Master's in Computer Science
(part-time)
2020 - present

Bangalore University

Bangalore University – India

Bachelor's in Computer Application
2013 - 2016

Allianz Technology (10/2021 – Present)

Senior Software Developer (01/2024 – present)

- As a lead developer, I interviewed and gathered a team of 7 and led the delivery of Allianz Italy's Intercompany Agreement greenfield project in 9 months, leveraging Spring Boot, Kafka, MongoDB, and AWS (ECR, EKS).
- Designed and implemented a middleware platform Enterprise Process Component (EPC) using (Apache Camel and Kafka) to synchronize multiple systems used by over 5K agents in Allianz France.
- Migrating legacy PL/I mainframe modules to Java, reverse-engineering undocumented business logic from production code and verifying functional equivalence against the original implementation.

Software Developer (10/2021 – 12/2023)

- Maintained and enhanced customer management system with REST API, wrote quality and reusable code, and resolved about 150+ bug reports, resulting in a more stable product version.
- Built a PoC for a modernized backend customer management system using Spring Boot and MongoDB, where data was synced with new system in real time by using Kafka Connect and presented to 10k viewers during Allianz Global Forum.
